The investment objective of the Fund is to track both the upward and the downward evolution of the MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered Index (the "Benchmark Index") denominated in US Dollars (USD), while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the Tracking Error).

Amundi ETFs are efficient investment vehicles listed on exchange that offer transparent, liquid and low-cost exposure to the underlying benchmarkindex.

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Index Data (Source : Amundi)

Description of the Index

The Benchmark Index aims to represent the performance of companies that are expected to derive significant revenues from the digital economy value chain including the metaverse ecosystem and exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe, based on an ESG rating. The ESG rating methodology is based on ESG key issues including but not limited to water stress, carbon emissions, labor management or business ethics. The Benchmark Index uses a "Best-in-class" approach, i.e., bottom quartile companies by ESG industry-adjusted rating are excluded from the theme universe. Limits of the methodology of the Benchmark Index are described in the prospectus of the Fund through risk factors, such as the market risk linked to controversies and the risks linked to ESG methodologies and to ESG score computation.
