Objective and Investment Policy

This Sub-Fund is passively managed. The objective of this Sub-Fund is to track the performance of MSCI Europe Minimum Volatility Index, and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return. MSCI Europe Minimum Volatility Index is an equity index representative of a portfolio of equities in the MSCI Europe index, selected to obtain the lowest possible absolute volatility of the portfolio while respecting the predefined risk diversification requirements (such as, for example, minimum and maximum weightings of securities, sectors and/or countries compared to the MSCI Europe index). Portfolio volatility is a measure of the risk, consisting of quantifying the amplitude of the variations of the value of the portfolio both to the upside and to the downside over a given period. Accordingly, the higher the volatility, the more the investment in this portfolio will be considered as risky and the more the risk of loss and/or expectation of gain will be significant. Low volatility nevertheless is not synonymous with risk-free investment. More information about the composition of the index and its operating rules are available in the prospectus and at: [msci.com](https://www.msci.com) The Index value is available via Bloomberg (MAEUVOE). The Sub-Fund will apply an indirect replication methodology to get exposition to the Index. The Sub-Fund will invest into a total return swap (financial derivative instrument) delivering the performance of the Index against the performance of the assets held. Derivatives are integral to the Sub-Fund's investment strategies.

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility *	9.85%	9.52%	15.25%
Benchmark volatility	9.85%	9.52%	15.26%
Ex-post Tracking Error	0.01%	0.01%	0.07%
Sharpe ratio	1.02	0.96	0.61

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

Risk & Reward Profile (SRRI) (Source: Fund Admin)

Lower risk, potentially lower rewards
Higher risk, potentially higher rewards

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.

We have classified this product as 3 out of 7, which is medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi Index Solutions prospectus.
