Index Data (Source : Amundi)

Description of the Index

The Index is an equity index based on the MSCI World Index representative of the large and mid-cap stocks across developed market countries (the "Parent Index"), that excludes companies from the Parent Index based on environmental, social or governance (ESG) criteria (e.g. exclusion based on business activities, including controversial weapons). Then, the Index applies on the remaining investment an interactive process aiming to reach a minimum 30% reduction in carbon emission intensity relative to its Parent Index. The remaining securities are then weighted by their free-float adjusted market capitalization.
