Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

Index Data (Source : Amundi)

Description of the Index

The Index is an equity index based on the MSCI EMU Small Cap Index (the "Parent Index") representative of small-cap securities across developed European Economic and Monetary Union ("EMU") countries. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with a strong MSCI ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.
