Objective and Investment Policy

By subscribing to Amundi Stoxx Europe 50 UCITS ETF (the "Fund"), you are investing in a passive management UCITS whose objective is to replicate, as accurately as possible, the performance of the STOXX Europe 50 index (the "Index"), regardless of its performance, positive or negative. The maximum tracking error objective between the growth of the net asset value of the Fund and that of the Index is indicated in the Fund's prospectus. The Index, net dividends reinvested (dividends net of tax paid by the shares in the Index are included in the Index calculation), denominated in euro, is calculated and published by the index provider STOXX. You are exposed to currency risk between the currencies of the equities that make up the Index and the currency of the Fund. The equities included in the composition of the STOXX Europe 50 Index are derived from the 50 most important securities of 18 European countries. The Index's equities cover all economic sectors and are chosen for their level of market capitalisation, liquidity and sectoral weight. More information on the composition and operating rules of the Index can be found in the prospectus and on stoxx.com. The Index is available via Reuters (.STOXX50R) and Bloomberg (SX5R). In order to replicate the Index, the UCITS exchanges the performance of the assets held by the Fund for that of the Index by entering into forward foreign exchange contracts or total return swaps (a forward financial instrument, "TRS") (synthetic replication of the Index).

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). Risk & Reward Profile (SRRI) (Source: Fund Admin)

1 2 3 4 **5** 6 7

Lower risk, potentially lower rewards
Higher risk, potentially higher rewards

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. The use of complex products such as derivatives can lead to increased movement of securities in your portfolio. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the Amundi Stoxx Europe 50 UCITS ETF Acc prospectus.
