Amundi US Inflation Expectations 10Y UCITS ETF GBP Hedged Dist A Sub-Fund of the SICAV MULTI UNITS LUXEMBOURG

ISIN code: (D) LU2418815390

Managed by Amundi Luxembourg SA, a subsidiary of Amundi Group

Objectives and Investment Policy

The Fund is an index-tracking UCITS passively managed.

The investment objective is to reflect the performance of the "iBoxx USD Breakeven 10-Year Inflation Index" ("Benchmark Index") denominated in USD, in order to offer an exposure to a long position in U.S. 10-year Treasury Inflation-Protected securities (TIPS) and a short position in U.S. Treasury bonds with adjacent durations.

The difference in yield (or "spread") between these bonds is commonly referred to as a "breakeven rate of inflation" (BEI) and is considered to be a measure of the market's expectations for inflation over a specified period of time.

In order to hedge the EUR currency risk, the Fund uses a monthly hedging strategy which aims at reducing the impact of a change in the Fund currency against the currency of the Benchmark Index constituents.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

In order to ensure the replicability of the Benchmark Index which the Fund reflects, the Benchmark Index methodology takes into account the costs associated with the building of a long/short position, in particular the borrowing costs of the short position.

Additional information about the Benchmark Index can be found at www.markit.com.

The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the FDI"). The Fund may also invest in a diversified portfolio of international debt securities, whose performance will be exchanged against the performance of the benchmark Index via the FDI.

Updated composition of the Fund holdings is available on www.amundiETF.com.

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

In order to hedge the GBP currency risk, the Sub-Fund uses a daily hedging strategy which aims at reducing the impact of a change in the share class currency against the currency of the Benchmark index constituents.

The share currency is the British Pound (GBP).

Invested financial instruments: Bonds, FDI.

Dividend Policy : the Sub-Fund's amounts available for distribution (if any) will be distributed annually.

The minimum recommended holding term is 3 years.

The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges, provided that the Market Makers can maintain market liquidity. Only authorised participants (e.g. selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the prospectus of the UCITS.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the market risk arising from inflation-linked bonds in which it is invested.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Risk of Financial derivative Instruments: the Sub-Fund invest in financial derivative instruments. These financial derivative instruments can induce different types of risks such as (but not limited to) leverage risk, high volatility risk, valuation risk or liquidity risk. If this risk occurs, the net asset value of the Sub-Fund may decrease significantly.
- Hedging risk : The currency hedging may be imperfect and generate a difference between the performance of the Index and the share you are invested in.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Not Applicable for secondary market investors*
Exit charge	Not Applicable for secondary market investors*
Conversion charge	Not applicable

This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.

Charges taken from the Sub-Fund over a year

Ongoing charges	0.30%
Charges taken from the Sub-Fund under certain specific conditions	
Performance fee	None

The **entry**, **exit** and **conversion charges** shown are maximum figures applied on the primary market only. In some cases you might pay less - you can find this out from your financial adviser.

The **ongoing charges** figure is based on expenses for the current year. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in another collective investment undertaking.

The ongoing charges displayed are estimated. For each accounting period, the Sub-Fund's annual report will display the exact amount.

*Secondary Market: because the Sub-Fund is an ETF, Investors who are not Authorized Participants will generally only be able to buy or sell shares on the secondary market. Accordingly, investors will pay brokerage fees and/or transaction costs in connection with their dealings on stock exchange(s). These brokerage fees and/or transaction costs are not charged by, or payable to, the Sub-Fund nor the Management Company but to the investor own intermediary.

In addition, the investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold.

Primary Market: Authorized Participants dealing directly with the Sub-Fund will pay related primary market transaction costs.

For more information about charges, please see charges paragraph of the prospectus of the UCITS, which is available at: amundi.com or amundiETF.com.
