Objective and Investment Policy

The Fund is a passively managed index-based UCITS. The objective of the Fund's management is to be inversely exposed with a daily rebalancing to the European stock market by replicating, both upwards and downwards, the development of the EURO STOXX 50® Daily Short strategy index (gross dividends reinvested) (the "Benchmark Index"), denominated in euro (EUR) and which is a short selling strategy (with a daily -1x leverage effect), with daily rebalancing, on the EURO STOXX 50® Total Return index (gross dividends reinvested) (the "Parent Index"), representative of the 50 largest assets belonging to Eurozone member countries, while keeping the tracking error (the "Tracking Error") between the performances of the Fund and those of the Benchmark Index to a minimum. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. Over a period of one working day, any appreciation in the value of the Parent Index shall lead to stronger depreciation of the net asset value of the Fund, meaning that investors will therefore not benefit from the appreciation in the value of the Parent Index. For a period greater than one working day, due to the daily leverage readjustment conducted in the Benchmark Index, the performance of the Fund will not be equal to the inverse of the performance of the Parent Index and may even follow an identical (i.e. not inverse) development. The website of the Benchmark Index provider STOXX Ltd. (www.qontigo.com) provides more detailed information about STOXX indices. In order to synthetically replicate the Index, the Fund exchanges the performance of the assets held by the Fund for that of the Index by entering into futures contracts or total return swaps (TRS). You will have a permanent investment, via the Basket, of at least 75% in securities eligible for the French Equity Savings Plan (PEA), which is reserved for French investors. The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundiETF.com. In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites.

Performances from 30/09/2016 to 30/09/2026 (Source : Fund Admin)

Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility *	14.95%	15.15%	20.74%
Benchmark volatility	14.95%	15.15%	21.46%
Ex-post Tracking Error	0.02%	0.04%	1.70%
Sharpe ratio	-1.04	-1.01	-0.48

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

Spread	0.56%	0.13%	-0.03%	0.00%	-0.09%	-0.49%	-0.43%	-0.62%	-0.58%	-0.58%

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Risk & Reward Profile (SRRI) (Source: Fund Admin)

Lower risk, potentially lower rewards
Higher risk, potentially higher rewards

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-fund's performance. Please refer to the MULTI UNITS FRANCE prospectus.

Index Data (Source : Amundi)

Description of the Index

The EURO STOXX 50 Short Return Index is linked to the performance of the EURO STOXX 50 Index in an inverse way - a positive development of the EURO STOXX 50 Index will result in a negative change of the same amplitude in the EURO STOXX 50 Daily Short Index and vice versa. I.e. if the underlying EURO STOXX 50 Index is down 2%, the EURO STOXX 50 Short Return Index is up 2% and vice versa plus interest earned on the investment (EONIA). Additionally the EURO STOXX 50 Short Return Index includes the cost of borrowing on a monthly basis. More information available on www.stoxx.com
