Objective and Investment Policy

By subscribing to AMUNDI ETF DAX UCITS ETF DR, you are investing in a passively managed UCITS whose objective is to replicate as closely as possible the performance of the DAX NET RETURN (the "Index") regardless of whether it experiences a positive or negative development. The expected level of the tracking error under normal market conditions is indicated in the Fund prospectus. The equities included in the composition of the DAX Index are derived from the universe of the most important securities in the German market. This covers the top 40 market capitalisations on the Frankfurt stock exchange. More information on the composition and operating rules of the Index can be found in the prospectus and on www.dax-indices.com. The Index is available via Reuters (.GDAXIN) and Bloomberg (DAXNR). In order to replicate the DAX NET RETURN Index, the Management Company employs "index-based" management using the direct replication method consisting of investing in financial securities that are part of the DAX NET RETURN Index in proportions that are extremely close to those of the Index. Eligible forward financial instruments may be used for hedging and/or exposure purposes. You will have a permanent investment, via the Basket, of at least 75% in securities eligible for the French Equity Savings Plan (PEA, a savings plan reserved for French investors).

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.
