Amundi MSCI World Swap II UCITS ETF EUR Hedged Dist

ISIN code: (C/D) FR0011660927

This Fund is managed by Amundi Asset Management, an Amundi Group company

Objectives and investment policy

The Fund is a passively managed index-tracking UCITS.

The Fund's management objective is to replicate, both upwards and downwards, the change in the USD-denominated MSCI World Net Total Return Index (net dividends reinvested) (the "Benchmark Index"), representative of large- and mid-cap companies in all developed countries, while minimising the tracking error between the Fund's performance and that of the Benchmark Index.

The tracking error anticipated under normal market conditions is indicated in the Fund's prospectus.

More detailed information on MSCI indices is available on the MSCI website (www.msci.com).

The Fund aims to achieve its objective through indirect replication, namely by entering into one or more over-the-counter total return swaps (financial derivative instruments, or "FDI"). The Fund may invest in a diversified portfolio of international equities, the performance of which will be swapped for that of the Benchmark Index through the FDI.

The current composition of the Fund's portfolio is set out on amundiETF.com.

In order to hedge against the exchange risk on the euro (EUR), the Fund uses a monthly exchange hedging strategy that aims to reduce the impact of the exchange risk against the currency of the Benchmark Index.

Furthermore, the indicative net asset value is published on the Fund's Reuters and Bloomberg pages and may also appear on its markets' websites.

The Fund's net profit and net realised capital gains are reinvested or redistributed each year at the discretion of the Management Company. You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.

Recommendation: this SICAV may not be appropriate for investors who plan to withdraw their money within 5 years.

Particular risks for the UCITS not included in this indicator are:

- **Counterparty risk:** The Fund is exposed to the risk of insolvency or other types of default of any counterparty with which it enters into an agreement or transaction, particularly in the case of financial derivative instruments traded over the counter or securities delivered under securities financing transactions.
