Objective and Investment Policy

The Sub-fund is a passively managed index-based UCITS. The Sub-fund's objective is to replicate the performance, both upwards and downwards, of the EURO STOXX 50 Net Return Index (net dividends reinvested) (the "Benchmark"), denominated in euro (EUR) and representative of 50 investment grade Eurozone securities, while minimising the tracking error between the Sub-fund's performance and that of the Benchmark. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. The website <http://www.stoxx.com/indices> provides more detailed information about the Benchmark. The Sub-fund aims to achieve its objective through direct replication, i.e. by primarily investing in a basket of assets consisting of the securities comprising the Benchmark and/or eligible financial instruments representing all or part of the securities comprising the Benchmark. In order to optimise Benchmark replication, the Sub-fund may use a sampling technique, as well as guaranteed temporary sales of securities. Any use of these techniques is indicated on the website amundiETF.com. The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundiETF.com. In addition, the indicative net asset value appears on the Sub-fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites. The Sub-fund is eligible for the French Plan d'Epargne en Actions (PEA) and, consequently, invests a minimum of 75% of its assets in the shares of European Union countries.

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.
