The Amundi MSCI Japan is a UCITS compliant exchange traded fund that aims to track the benchmark index, MSCI Japan Net Total Return Index offsetting the impact of daily variations of the index local currency vs. the GBP. The GBP-hedged share class offers the simplicity of a daily currency hedge mechanism that is embedded in the investment product, representing an efficient solution to manage the foreign-exchange risk.

Amundi ETFs are efficient investment vehicles listed on exchange that offer transparent, liquid and low-cost exposure to the underlying benchmarkindex.

## Risk & Reward Profile (SRRI) (Source: Fund Admin)

Lower risk, potentially lower rewards  
Higher risk, potentially higher rewards

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.

If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.
