Objective and Investment Policy

The objective of this Sub-Fund is to track the performance of STOXX Europe Total Market Defense Capped Index (the "Index"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is a Net Total Return Index, meaning that dividends net of tax paid by the index constituents are included in the Index return.

Risk & Reward Profile (SRRI) (Source: Fund Admin)

Lower risk, potentially lower rewards
Higher risk, potentially higher rewards

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.

« Technical net asset values may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a business day nor a transaction day. Index Data (Source : Amundi)

Description of the Index

The Index is an equity index designed to capture the performance of eligible equity securities from the STOXX Europe Total Market Index (the "Parent Index"). The Parent Index covers approximately 95 percent of the free float market capitalisation across 17 European countries, as per Index methodology. Eligible equity securities are companies classified in the Aerospace and Defense sector, according to the Industry Classification Benchmark ("ICB"), and that have a proven revenue exposure to defense activities. The defense revenue exposure is defined using Revere (RBICS) data and the Index aims to capture companies with proven exposure to the Defense theme.
